PROJECTS

Sales Performance Dashboard | Power BI

Tools: Power BI, Excel

- Analyzed sales, profit, and customer data.
- Built KPI cards for Revenue, Profit, and Sales Performance.
- Created revenue analysis by city, product, and channel.
- Developed interactive filters and drill-down reports.
- Enabled business performance monitoring through visual analytics.

CO2 Emission Analysis Dashboard | Tableau

Tools: Tableau

- Analyzed global CO2 emission data across multiple regions.
- Built geographical visualizations and trend analysis dashboards.
- Compared emission patterns between countries and regions.
- Developed interactive filters for user-driven insights.

Android-Based Online Exchange Application | Java, XML, Android Studio

- Developed an Android platform for college students to buy, sell, rent, or exchange items.
- Implemented secure user authentication using Firebase with multi-role support.
- Designed an intuitive and affordable interface promoting sustainable student exchanges.

Company Visitors Management System | HTML, CSS, JavaScript, MySQL

- Developed a web app to log and manage visitor data for 100+ daily entries including purpose, contact, and entry/exit times.
- Designed a database schema for efficient log tracking and reporting.
- Provided a secure digital alternative to paper logbooks, improving record accuracy and accessibility.
